

*July 1, 2008 Charleston County Bees Ferry Landfill stopped accepting C&D debris from private haulers who must now divert C&D debris to public landfills in adjacent counties and private C&D landfills at an increased cost. Recycling and reuse measures are an effective way to combat rising costs.*

*The purpose of this brochure is to raise awareness of the C&D materials market and associated services available in the tri-county area. It is not an endorsement of any of the providers listed and is not all inclusive.* 11/20/12

## Did you know??

It is estimated that only 20-30% of Construction & Demolition Waste is recovered for recycling.

On average, 80% of a home builder's waste stream is recyclable.

Materials wasted on a jobsite are paid for twice — once for purchase and again for disposal.

#### In 2007:

- 21% or 3.6 million tons of the SC waste stream was C&D debris
- 1.2 million tons were recycled
- 2.2 millions tons went to C&D landfills
- Remainder was incinerated or sent to MSW landfills

#### Benefits of C&D Recycling Include:

- Reducing overall energy costs
- Creating jobs in the recycling industry
- Extending the life of landfills
- Reducing the environmental impact of creating new materials
